- Founded in 2020, Testo Pizza by Testo Inc. – Italian-inspired restaurant chain has been expanding its restaurants and franchise system world. In 2020, Testo Pizza launched its very first restaurant in Vietnam. Together with the opened trading trend, Testo Pizza is one of the pizza brands that has a significant development in Vietnam with more restaurants throughout the nation and becomes a favorite place for Vietnamese customers for the past 2 years. However, they are facing a problematic issue, mostly because of the huge number of people going to their outlets on a daily basis. It is now rather hard for their employees to serve each customer properly in an overcrowded joint. If they open more restaurants, it will certainly put a great financial burden on their budget. That's why the board of directors in Testo Pizza has decided to launch a website in order for their customers to order pizzas online with ease. Besides, all of the food orders and food items will be managed by a system whose access is granted to Testo's administrators. Their expectations for the websites are as follows:
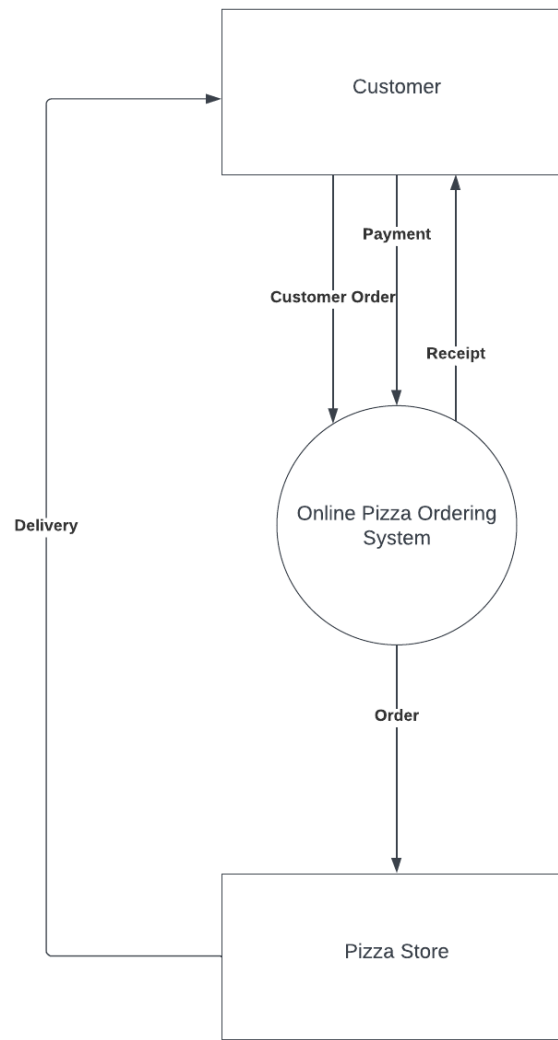

◆ **Functional**

For the visitor's website

- A home page will brief about the company, also design a suitable logo and include it on home page, you may display the logo on all the pages in the site.

- A menu which will include all the functions implemented in the site.

- A catalogue should be provided to help visitors choose and order their desired pizzas and other food items.

- A shopping cart will store visitors' orders and print the bill after they check out.

- A store page will show the address list of Testo Pizza.'s joints along with their locations on the map.

- A feedback page allows visitors to express their reviews on the quality of services from Testo Pizza.

◆ **Functional**

For the admin's website

- A login page will grant access to Testo Pizza.'s admins or the webmaster.

- A management page for Testo Pizza.'s admins will be used to insert, delete, or update the menu of Testo Pizza.'s as well as keep track of customers' orders, account info and feedback.

- A management page for Webmaster to insert, update, delete the accounts of Testo Pizza.'s admins based on its executives.

Test Result

Functional	Table use	Actor	Status
- Login - Register - Edit Account Information	User	Guest	Done
- Add to cart product - Order product - Rating Product	Product, ProductDetails, User, Orders, OrderDetails, Rating	Guest	Done
- View Order history	Product, ProductDetails, User, Orders, OrderDetails, Rating	Guest	Done

Test Result

Functional	Table use	Actor	Status
- Login	Admin	Admin/Webmaster	Done
- ContactUs Management	ContactUs	Admin/Webmaster	Done
- Admin's account Management	Admin	Webmaster	Done
- User's account Management	User	Admin/Webmaster	Done
